Hot Issue Paper Freedom-REV.docx

Shawn,

See issue paper Bill Arguto provided. I believe the talking points/media statements I provided earlier address these waters issues. There's more specificity here, but not talking points per se.

Linda/Terri; I wasn't sure who was coordinating the response - Attached is a recent Hot issue paper that might be useful. It focuses on the residual issues but the background section provides some basic information on the Freedom spill. I would not include the details of the residuals issues other than the fact that EPA is reviewing it

Bill

Kathy - Per me voice message, we need to dig up the most recent summary/talking points on the WV spill for OMB.

Thanks - Shawn

Just spoke to Mike - its needed because OMB Director is giving a speech wants information in case questions come up. We agreed that we would first provide existing TPS/summary and then determine if a call is necessary. Shawn can you have your folks send my existing TPS/summary?

Let me see who is available from the region today - are there particular issues you want covered? It may be that it may have to pushed to early next week based on availability.

Someone from the Regional offices that has been leading the effort would be best. Let me know your availability and we'll connect with someone.

Mathy - Would you (or someone else) be able to talk with me tomorrow or Monday about what EPA has done regarding the WV oil spill?

Thanks  
Mike
